### **DETAILED ACTION**

1. This office action is in response to application 10/600,846 and RCE with submission of IDS filed on 12/22/2005. Claims 1-20 remain pending in the application.

#### ***Terminal Disclaimer***

2. The terminal disclaimer filed on 9/7/2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of the patent [6,501,297] has been reviewed and is accepted. The terminal disclaimer has been recorded.

#### ***Examiner's Amendment***

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kim Kanzaki, Ph.D (37,652) on 3/9/06.

The application has been amended as follows:

**Claim 1**, line 5, delete "are same or similar" and insert --is substantially same--.

**Claim 8**, line 4, delete "are same or similar" and insert --is substantially same--.

**Claim 12**, line 6, delete "are same or similar" and insert --is substantially same--.

**Claim 13**, line 6, delete "are same or similar" and insert --is substantially same--.

Art Unit: 2825

**Claim 14**, line 11, delete "are same or similar" and insert --is substantially same--.

**Claim 15**, line 9-10, delete "are same or similar" and insert --is substantially same--.

**Claim 16**, line 6-7, delete "are same or similar" and insert --is substantially same--.

The changes correct minor informality and ambiguous claim limitation.

#### **EXAMINER'S STATEMENT AS TO THE REASONS FOR ALLOWANCE**

4. Claims 1-20 are allowed over the prior art of record.

5. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or fairly suggest a method for determining signal routing cost for an integrated circuit having topology units and routing resources as recited in the claims. For example, a combination of determining a respective span in terms of one or more of the topology units for each of the routing resources, wherein each of the topology units is substantially same to the other topology units; assigning a cost value to each of the routing resources using the respective span associated with; selecting a routing resource from the routing resources; calculating at least one distance between the routing resource and at least one other of the routing resources; and computing a future cost value for the at least one distance using the cost value assigned to the routing resource as recited in claim 1 is not taught by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
